

Professional Alfresco: Practical Solutions For Enterprise Content Management

Discover what makes Alfresco a unique solution for your business needs

Alfresco is a fast, cost-effective enterprise content management system for Web sites and content applications provided under an open source license. This book will help developers, architects, Web site architects, project managers, and content management professionals understand what Alfresco provides, how it can be implemented, and how Alfresco can integrate into existing applications or Web sites. This is the definitive resource written by the people who built Alfresco.

Professional Alfresco:

- Discusses the fundamental Alfresco architecture, components, and services
- Shares detailed guidance on building content applications with the Alfresco platform
- Explores Alfresco's use of new content management standards like Content Management Interoperability Services (CMIS)
- Explains how to extend Alfresco for custom functionality through easy Web scripting
- Offers an overview of the Spring Surf Framework, its features, and how it can be used
- Provides real-world code examples and scenarios in Java® and JavaScript® with various levels of sophistication and complexity
- Addresses integration with other applications, Web sites, and portals including Lotus®, Drupal®, SAP®, and Liferay®

David Caruana is the Chief Architect for Alfresco Software.

John Newton is the CTO and Chairman for Alfresco Software.

Michael Farman is the Director of Product Management for Alfresco Software.

Michael G. Uzquiano is the Director of Web Platform Tools for Alfresco Software.

Kevin Roast is the User Interface Technical Lead for Alfresco Software.

Wrox Professional guides are planned and written by working programmers to meet the real-world needs of programmers, developers, and IT professionals. Focused and relevant, they address the issues technology professionals face every day. They provide examples, practical solutions, and expert education in new technologies, all designed to help programmers do a better job.
