GUIDING PRINCIPLES

OUR SHARED PREMISE

In American democracy, elections should represent the will of all the people, not just the politicians, and should provide citizens with meaningful choices in electing representatives. When partisan politicians manipulate voting maps to keep themselves and their parties in power, they shape election outcomes before the first vote is cast. When that happens, voters feel they have no voice, and legislators feel less need to listen to constituents.

We believe Pennsylvania needs to reform its redistricting rules and make the process of drawing districts impartial, transparent, and accountable, promoting competitive elections and partisan fairness so that our government truly is of, by and for the people.

STANDARDS FOR REDISTRICTING

- Adhere to all Constitution and Voting Rights Act requirements.
- Make all districts as equal in population as possible within an established minimal range of deviation.
- Respect political subdivisions and communities of interest.
- Encourage geographical compactness and respect for natural geographical features and barriers.
- Prohibit districts from being drawn for the purpose of favoring or discriminating against a political party or candidate.

PRIORITIES FOR REDISTRICTING REFORM

- Assign the redistricting power to an independent commission, of which neither the commissioners, nor members of their immediate families, may be government or political party officials.
- Ensure the transparency of the process and meaningful opportunities for public participation.
- Conduct redistricting once each decade, following the census, with a strict timeline for completion.
- Address other causes of districting unfairness.
